

September 2018

Dear Parent/Guardian

GCSE Design and Technology

Your son/daughter has opted to study Design and Technology to GCSE level. The course requires students to design and make products in a range of materials including wood, metals, plastics, fabrics, electronics and food.

The programme of study offers diverse and exciting opportunities for your child, however, the resource implications for the school are considerable. We would therefore ask for a single voluntary contribution of £15.00 to support, maintain and develop the range of materials, media and equipment available to your son/daughter over their 2 year GCSE course, and additionally enable students to take completed GCSE coursework home.

Please complete the electronic reply slip via the link on the email. This will ensure payment can be made online through your child's ParentPay account.

Yours sincerely

Mr J Gamble
Leader of Design and Technology
