# The 6 Rs for Successful Revision

## RAG Rating

### How?

Break down each subject into topics.

**Red, Amber, Green** (RAG) your

knowledge and skills. Your analysis should be based on mocks/self-assessment/teacher assessment and not your opinion.

Every few weeks, you should RAG rate topics again to inform your revision. Don't spend too long on this. As long as your reflection is accurate, you should move onto the next stage.

**Benefits**  
Helps focus more time on what we don't know and, likewise, less on what we do know.

## Red

### How?

Based on your RAG rating, spend less time on the **Green** areas in your revision (quick revisits for 5 minutes).

Climb the mountain and tackle the **Red** areas.

You can do this by: informing your teachers who in turn plan revision around this; studying the topic for longer periods at home; turning anything you don't know into a question. Ask your teacher next lesson.

**Benefits**  
Helps your teachers plan revision lessons. Helps inform learning conversations between you and your teachers.

## Revise

### Methods

Revision is learning to unlock your memory. You need to have memory prompts to help you 'call up' what you know.

Use your RAG rating to decide how long to spend on each topic. For some topics, it should be little and often.

Don't have distractions (music with lyrics/beats/social media/television/mobile phone). Revision should be active not passive revision.

**Notes**  
**Revision Cards**  
**Mind Maps**  
**Memory Aids**  
**Past Papers**  
(Including mark scheme)  
**On-Line Resources**

**Benefits**  
Applying yourself during your five lessons each day is the most important preparation for your exams. However, it is also important to revisit the knowledge and skills needed for each exam.

## Review

### Test Your Knowledge Recall & Skills

Without notes, you should complete parts or whole past papers to apply your knowledge and skills.

Ensure you understand the mark scheme, timings and command word for each question.

**Benefits**  
Show if your revision is working or not - can you recall key points? Become familiar with the written exam.

## Repeat

### How Our Brain Works

Another word for revision is repetition. This process is an on-going cycle for all your subjects.

Your RAG rating should slowly change from **Red** to **Green** the more you repeat the cycle.

**Benefits**  
The more you repeat revision areas, the more likely you will remember it.

## Rest

Time management is key to ensuring you are mentally prepared for your exams.

A Revision Timetable will help you plan your life and be more efficient.

Have quality revision time and, likewise, quality time off.

**Emotional Support**  
Speak to friends, family, teachers or for support. Ensure you are eating and sleeping well.

**Benefits**  
You need to feel mentally prepared for your exams: charged up, switched on and focused for the challenge ahead.
