## Key Stage 3 Year 8 – Science End of Term Assessment

Dear Parent/Guardian

As part of our updated Science Curriculum we are now implementing New end of term assessments for all years in Key Stage 3. These will cover all of the content the students have studied during the course of the term. The outcome of these assessments will be combined with the results from both the Mathematics and Computing end of term assessments. These will then be used to modify the sets accordingly for the Spring term 2020.

The assessment will take place week commencing the 2 December 2019, your child's Science teacher will inform them of their confirmed assessment date in due course. I have attached the knowledge map that students have been using within lessons, as a starting point for their revision. Other optional resources students can access are;

- **Seneca learning**
- **BBC Bite size**
- **Revision guides**

Each year group will sit a one-hour exam during their class time, the topics that will be covered in the assessment are below:

	<b>Year 8</b>
<b>Biology</b>	8D – Unicellular organisms
<b>Chemistry</b>	8F – The periodic table
<b>Physics</b>	8L – Earth and Space(*)

Any questions please don't hesitate to contact a member of the Science department in school.

Yours sincerely

Dr Finn  
Leader of Science
